

2017 CAPITAL IMPROVEMENT PLAN

This plan lays out potential projects that the Allen County Water District (ACWD) is considering for improvements for their water distribution system.

- **US 31E Booster Station Improvements**

Project will make improvements to booster station to allow for operation as a constant pressure system. This would allow for operation while Highway 98 Tank is out of service for maintenance.

Estimated Cost \$ 50,000

- **KY 231 Elevated Tank**

The KY 231 Tank would be a new tank along KY 231 to replace the existing Lambert Standpipe tank that does not have adequate storage capacity due to growth over the recent years.

Estimated Cost \$ 1,750,000

- **Old KY 231 Water Line Replacement**

The Old KY 231 Water Line Replacement will replace a section of 8-inch water line that has experienced a large percentage of breaks and leakage. The line will be upsized for the growth that has been experienced in the recent years.

Estimated Cost \$ 1,500,000

- **Highway 98 Elevated Tank Recoating**

The Highway 98 Tank needs to be repainted (interior & exterior) and a few spot repairs. Project will need to include containment.

Estimated Cost \$ 400,000

- **Booster Station Improvements**

The BS Improvements would replace existing below grade stations with above ground stations with higher efficiency motors.

Estimated Cost \$ 750,000
