RE: Generator Maintenance and Fuel budget

To whom it may concern:

The Northern Kentucky Water District owns and operates multiple emergency generators through our water production and distribution system. As such, NKWD maintains a particular line item in the annual budget for the maintenance and fuel cost associated with the emergency generators.

Account number is 620-6003-025 is designated for all Generator Maintenance and Fuel. The 2015 budget amount was \$40,000.

The District also has contracts associated with the required preventative maintenance for the generator equipment.

If you have any questions please call 859-426-2715.

Regards,

Lindsey Rechten  
Acting Vice President of Finance and Support Services/CFO
